The Tankoa Project Bolide Yacht Doesn't Have A Single Flaw

by C.J.

The best kind of boat is the kind that is owned by a friend. The next best kind of boat is a mega yacht like the Tankoa Project Bolide yacht that has water views from all of its 6,500 square feet of floor space. Seriously, this yacht has so much glass, you need a 10 man Windex team with you to keep it all clean. This yacht is so amazing that it makes me want to go out and make new friends. Ultra rich new friends who I can convince to buy it.

The amenities in this [super yacht](#) are endless. As stated previously, the Tankoa Project Bolide yacht has 6,500 square feet of floor space, which is chopped into an elevated owner's deck and five VIP suites. Outside, you will find three pools, a jacuzzi, a helipad, and just enough space to soak in the sun and views.
