

Tankoa Launches 50-Meter Vertige Motor Yacht

Tankoa announces that it successfully launched its 50-meter motor yacht, Vertige, in February and plans to deliver the yacht to her owner in April. Tankoa takes a boutique approach to building yachts that meet the unique specifications of owners. Vertige is the shipyard's second yacht.

Even though Tankoa doesn't have as much experience as many other shipyards, it has created a remarkable vessel with a classic exterior aesthetic and plenty of technological advancements. Some of the yacht's most impressive features include her floor to ceiling windows and full-displacement, aluminum-build hull.

Tests show that Vertige can reach a maximum speed of 16 knots. Cruising at 12 knots, she can travel 5,000 nautical miles without refueling.

Vertige stands out for its long list amenities, which include a fitness center, cinema, and seven-meter tender garage. Her main deck features an owner's suite and VIP suite. The lower deck has two VIP and guest cabins. The owner's suite and aft deck have hydraulic balconies.

Tankoa has managed to create a tech-savvy yacht that exudes warmth. It's a comfortable way to explore the world without losing contact to the latest technology
