Tankoa 50m M/Y Vertige Announced Successful Sea Trails

Tankoa Yachts is a "Boutique Shipyard" that is entering its ninth year of producing some of the highest quality yachts in the world with a unique multicultural approach to designing that incorporates the best features of numerous unique cultures. The Italian based company prides itself in its dedication to luxury and obsession to detail, and—having received numerous awards in the past decade—is proud to announce the recently successful sea trials of Vertige.

Vertige is a 50m beauty that was launched in February of this year and successfully delivered in April. The concept and exterior design were both a product of the creative imagination of Francesco Paszkowski, and—along with the efforts of Paszkowski—the interior design was collaboratively made with Margherita Casprini. The hard work of these two world class yacht designers has certainly paid off; thus far, the sea trials have gone even better than expected and Vertige has been attracting the attention of boat owners and enthusiasts across the world.

What has made Vertige a uniquely high-performing vessel has been its ability to handle a variety of trial obstacles and overcome relatively troubling waters. Furthermore, the yacht has consistently demonstrated an ability to reach a top of speed of 16.5 knots while carrying a 60% load. The company claims she has exceeded even their own optimistic expectations and credits such success to their dedication to high-performance and ample synergy existing between the design team, the captains, and the business end of the production process.

Ultimately, it seems there is really no limit as to what Vertige (a part of the S501 project that has gained admiration from a variety of parties) can do. This boat is one that is capable of sailing almost anywhere in the world and has been performing above or on par with seemingly every other vessel in her class.

Rossinavi Announced the Launch of M/Y N2H

Rossinavi has earned its reputation as one of the premier Italian shipbuilders for a reason; their dedication to both luxury and performance have produced some of the finest ships in the world. One of the newest Rossinavi boats, the N2H—which is apparently a shorthand for "Nice to Have"—set sail out of Pisa on April 29th and has since been craving to explore the world.

Both the interior and exterior of this beautiful piece of craftsmanship were designed by the world-renowned Enrico Gobbi design team, and this 48.5m beauty has been a high-performing spectacle worth experiencing first hand. The boat can carry nearly 500 gross tons of weight—a relatively impressive number considering its size—and furthermore, it has demonstrated an ability to cruise at speeds over 15 knots consistently.
